

SUMMARY

I have proficiency in C, C++, C#, Java, Python, PHP, HTML, CSS, and Basic MySQL. With a BCA degree in Computers from Vidyavahini First Grade College, Tumkur, I have a vision to create innovative solutions using my programming skills. I have experience in projects like Hospital Management, Online Crime Management, and Attendance Management System. I aim to contribute to the growth of organizations by implementing user-friendly systems, ensuring security, and fostering a culture of efficiency.

PROJECTS

HOSPITAL MANAGEMNT

OCT-2022

The website is designed interactively to provide users with information about the hospital's expertise, experience, and hospitality. Patients can also receive daily updates on their queries and browse through the profiles of the doctors.

ONLINE CRIME MANAGEMENT

MAR-2023

Efficiently managing online crime involves several key components: strong security measures, using AI to detect threats, encouraging teamwork, raising awareness through campaigns, staying ahead of cybercriminals through research and development, and nurturing a cybersecurity culture to provide complete protection.

ATTENDANCE MANAGEMENT SYSTEM

JUL-2023

Streamlining attendance management in any organization involves implementing user-friendly systems, tracking employee punctuality, promoting accountability, ensuring accurate record-keeping, and fostering a culture of attendance awareness to maintain efficiency.
